

## UTAH IRRIGATORS TO HOLD MEETING

Conservation of Water Is the  
Principal Subject for  
Discussion.

DATE NOT YET FIXED

Gathering, However, Will Be  
Held Early in the Com-  
ing Month.

A meeting of Utah irrigators will be held at the Commercial club early in November for the purpose of studying and discussing the conservation of water. The exact date will be decided upon and arrangements made for the issuance of notices at a meeting to be held in the Commercial club Tuesday. Those expected at the meeting are Dr. John A. Widdow, president of the Agricultural college; Dr. E. G. Peterson of the Agricultural college; Dr. R. R. Lyman of the University of Utah, and probably Governor William Spry, who will issue an official proclamation when the decision of those at the meeting is made known.

Decision regarding the meeting was made yesterday at a luncheon held in the Commercial club, at which Governor Spry, Dr. Widdow and the board of trustees of the college were the guests of honor, being entertained by the demonstrators of the Agricultural college.

### Matter Important.

The meeting will be similar to one held in the clubrooms May 9, at which time the "Duty of Water" was discussed. It will include in its scope the best methods of covering the greater area of land with the present water supply, increasing of crops and the prevention of over-irrigation. It probably will last two days.

The luncheon yesterday was of an informal nature and served to acquaint Governor Spry and the college officials with the nature of the work being done by the various farm and home demonstrators working throughout the state under the direction of the college.

This was the first meeting of the kind held since the enactment of the law by the last legislature creating these offices, and inasmuch as it was largely through the instrumentality of Governor Spry that the bill became a law, his personal interest in the matter has led him to keep in close touch with the work.

### People Enthusiastic.

State Leader R. H. Evans and seven of the county demonstrators were present, and each gave a brief report of the work accomplished. The reports showed that, far from being unappreciative, the people living in the various counties are enthusiastic over the assistance being given them in their labors by men and women trained for the purpose. Various problems of greater or less importance that confront the various districts were brought out in the reports. The movement has already proved so popular that it appears necessary to augment the present corps of workers at the earliest date possible. Problems of irrigation, seed selection, drainage, crop rotation and better dairy cattle are among those being worked out by the demonstrators. Miss Amy Lyman, whose efforts are being devoted entirely to the problems of the farm home, is being kept up to her capacity in endeavoring to keep up with the demand for her services.

### Demonstrators Present.

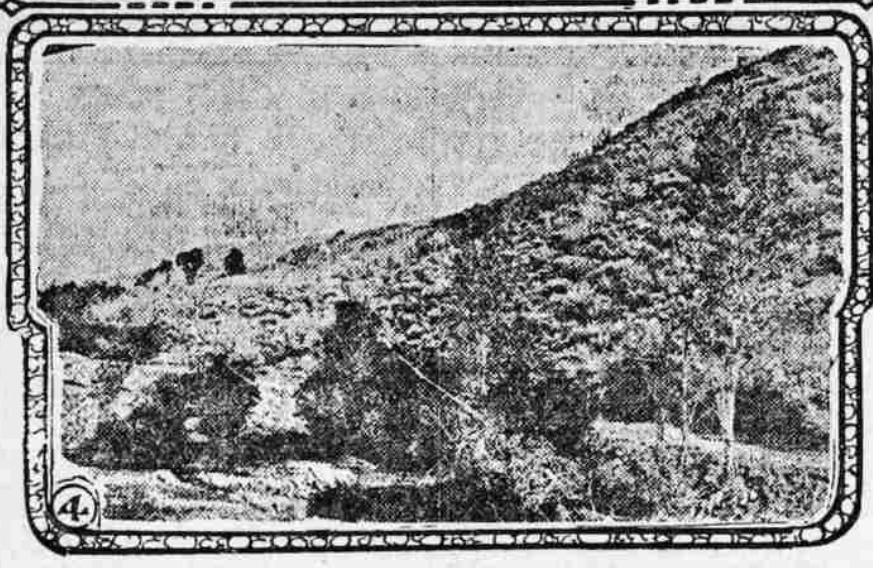

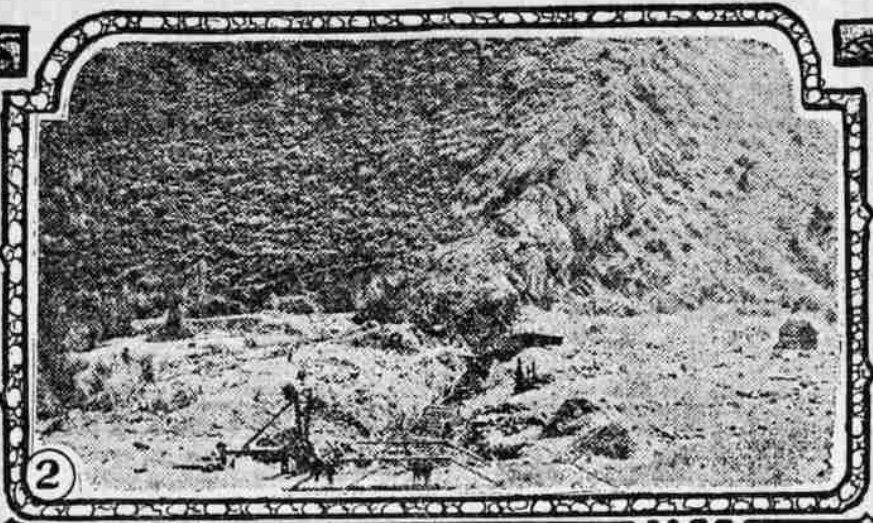

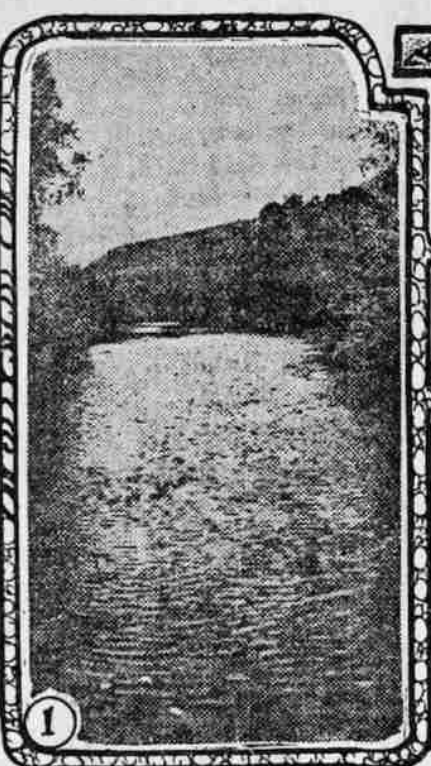

County demonstrators present were: Stewart of Emery and Carbon counties; Glenn of Wasatch and Uintah; Merrill of Sevier, Wrigley of Iron, Welch of Millard, Haddock of Salt Lake and Miss Amy Lyman and Professor L. M. Winsor, workers-at-large.

At the conclusion of the reports Governor Spry spoke briefly of the importance of the work and encouraged the demonstrators to spare no effort in bringing their work before the farmers and housekeepers throughout the state. He expressed the hope that the work would continue to grow in importance until eventually every county in the state would be supplied with a trained expert to assist the farmers and the farm women to acquire more of the comforts which modern scientific development has produced.

In addition to Governor Spry, those present at the luncheon were Dr. and Mrs. John A. Widdow, Dr. and Mrs. E. D. Ball, Dr. and Mrs. E. G. Peterson, John Derr, Mr. and Mrs. Thomas Smart of Logan and the several county demonstrators.

## \$1,000,000 Project Now Under Way in South Fork Canyon Will Greatly Increase Ogden and Weber County's Water Supply

PHOTOGRAPHS taken of the new Ogden waterworks project. (1) The crystal waters of South Fork which will be stored for the use of Ogden citizens and the irrigation of Weber county lands. (2) South Fork canyon east from the dam site. This canyon for a distance of two miles will form the reservoir. (3) Near view of trench construction, showing bedrock uncovered at the bottom. (4) Site of the South Fork dam, looking across the canyon from the north end of the foundation trench.

## PAVING BIG HELP IN HIGHLAND PARK

Kimball & Richards Plan  
Home Building Campaign  
for Next Spring.

Street paving to Highland Park is now an assured fact. On Friday a contract was awarded to P. J. Moran, the lowest bidder, and work will be started at once and rushed to completion. Every effort will be made to complete the improvement this year. This is the crowning achievement in noteworthy improvements which have contributed to the development of Highland Park. A big campaign of home building is already being planned for early next spring.

Gas mains will be laid through the main streets before the pavement is installed. Additional water mains will be run and numerous other improvements made. Land values along Highland Park drive have received a very beneficial effect as the result of the announcement of the paving extension, and there is every reason to predict Ninth East prices by spring. During the week Kimball & Richards, land merchants, have enjoyed a very satisfactory business, both from the state fair and at the Main street office. The farm and ranch department also reports the most active week since its organization.

## MAY BUILD A LARGE WAREHOUSE IN CITY

N. H. Burt, president of the Great Western Storage company of Leavenworth, Kan., said to be the second largest concern of its kind in the world, who has been visiting here for several days, left yesterday for Seattle. He was here several days going over the ground with E. R. Stephens, his local representative, with a view to establishing a warehouse in Salt Lake City.

Although Mr. Burt left without making an announcement, the favorable things that he said regarding Salt Lake City and Utah and the mysterious way in which he told of his building warehouses in other cities led to the general belief among his hearers that he would build a warehouse here in the spring.

### Big Demand for Buttons.

An order for 100 of the "I Am for Utah" buttons was received at the offices of the publicity bureau of the Commercial club yesterday. The business of selling the buttons is progressing steadily, according to the officials of the bureau, more than 27,000 of the buttons having been sold since the campaign was started.

## Additional Flow Also Will Be Used for Irrigation Purposes.

Special to The Tribune.

OGDEN, Oct. 4.—The accompanying pictures are the first published photographs taken at the site of the South Fork dam and reservoir project, which is being developed, at a cost of \$1,000,000. Approximately one-third of the project will be completed within the next twelve months, at a cost of \$350,000.

With the expenditure of \$350,000, the project will furnish Ogden City with an unlimited supply of water for municipal purposes and also furnish 10,000 acre feet for the irrigation of Weber county land. Concrete construction on the 600-foot dam has been started and officers of the Ogden River Reservoir company to complete the structure in time to impound the flood waters of South Fork river in 1914.

Conceded to be the most important project of northern Utah, the South Fork dam and reservoir will also be one of the largest water-impounding plants of the entire state. Wedged in a graceful arc between the rocky walls of the South Fork canyon at a point about twenty miles east of the city, the 600-foot dam constructed, as intended at this time, to a height of 120 feet above the river bed, will impound approximately 10,000 acre feet of water, which is equal to more than 400,000,000 cubic feet. Considering that thousands of acres of Weber county land are now supplied with sufficient water for irrigation, with the exception of two months of the year, it is readily realized what the storing of 10,000 acre feet of water for the dry period will mean to the future of Weber county.

At a height of 120 feet the dam will back the water for a distance of nearly two miles to the east. Eventually the dam will be constructed to the full height of 200 feet, when 25,000 acre feet of water will be backed into the mouth of Beaver canyon, a distance of more than three miles. All plans and specifications have been drawn for a dam of the height of 200 feet, although the agreement between the city and company provides for a 120-foot structure, which is to be an earthwork dam with a reinforced concrete core to the full height of the barrier.

Dr. Samuel Fortier, chief engineer

for the United States department of agriculture, has approved the bedrock which has been exposed for the entire distance across the canyon. In addition to this, he is of the opinion that an earthwork dam, with a concrete core, is the safest structure for the impounding of water in South Fork. With a dam of this construction, according to his report, the core wall may be fractured at several points, yet the whole structure will remain intact and absolutely safe. The slightest fracture in a dam of solid masonry impairs the whole barrier.

## MANIFEST INTEREST IN AUTO HIGHWAY

Commercial Club Committee Writes to  
District Forester Sherman and  
Makes Suggestions.

A letter was yesterday sent to E. A. Sherman, district forester in the United States department of agriculture at Ogden, by the Commercial club committee on Grand Canyon Automobile highway, consisting of Glen Miller, chairman; N. H. Bertram and Roscoe M. Breeden, and having to do with the proposed highway from the Grand canyon to the Yellowstone park.

The principal matter discussed in the letter was the feasibility of getting rid of the cattle now grazing on the Kaibab national forest for the purpose of stocking the forest with elk and buffalo, in order to make the forest a great game preserve. Information is asked regarding the present lease held by the cattle men.

### UTAH.

Who'll buy my apples and cherries,  
My peaches, my pears and berries?  
Who wants my meaty potatoes,  
My big, red, luscious tomatoes?

Who'll trade for my lambs and my ewes—  
Give my people warm hose and shoes?  
My cattle, my horses and grain,  
Who'll buy them—they're bred true to name?

My poultry, my eggs and my pigs  
Go to town in all sorts of rigs;  
And my housewives pocket the cash  
With a most commendable dash!

My copper, my silver and gold  
From earth's inexhaustible hold,  
Are sent in all countries and climes,  
The product of Utah's great mines.

My people are rugged and strong,  
They live a life happy and long,  
So of all of my state's great wealth,  
The best thing of all is my health.

Don't you think that we ought to say,  
Just before we finish this lay,  
That babies are called my best crop—  
But they can't be bought for a shop!

CHARLES G. PLUMMER.

The Superior Baking company this year eclipsed all previous efforts in the display at the state fair, making a showing that is one of the most beautiful and artistic ever seen at a Utah fair. The exhibit was awarded first prize for artistic display as well as for quality of goods shown. The artistic effects in the exhibit were obtained through the use of daintily colored boiled sugar. As the central figure of the exhibit, a magnificent reproduction of the Salt Lake temple stands out in bold relief against the background. At either side are models depicting, at the left, a cottage amid mountain peaks, with a gently sloping foreground leading to the valley below, and at the right the "royal gorge" in the Grand Canyon of the Colorado, showing a miniature train approaching the hanging bridge. The reproductions are authentically done and the coloring of the sugar is artistic in the extreme. The background of the exhibit is a painting of the immense bakery showing the long line of delivery wagons ready to leave on the morning delivery. The foreground is composed of showcases filled with the most toothsome and tempting pastry and cakes, with huge loaves of bread standing as sentinels at either side. In a large glass case, in a conspicuous position, are the medals won by this company at previous fairs. The display was one of the most popular in the manufacturers' building and attracted widespread attention by reason of the unusually artistic and effective design.

## WHILE IN TOWN

See the SELF-FILLING INDIVIDUAL SACRAMENT SERVICE.

It is by far the best ever invented. Some special attractions in the book line for you at our store. Come in and look around. Now is the time to save money on BOOKS for XMAS. We have 1000 books for boys and girls—regular price 40c to 60c—which we are selling at—

# 25c Each 5 for \$1

We have also

One Thousand \$1.00 and \$1.50 books regularly which WE SELL AT 50c.

## "THE WINNING OF BARBARA WORTH" AND OTHER GOOD ONES ONLY 50c

ALL GOOD BOOKS AT OUR STORE AT THE RIGHT PRICES.

Buy your XMAS BOOKS NOW and SAVE MONEY.

Take with you those Sunday School Song Books you need.

## DESERET SUNDAY SCHOOL UNION BOOK STORE

44-46 EAST SOUTH TEMPLE.

## Four Years of Wonderful Progress

Brief history of development of  
the biggest and best residence  
subdivision in the west

Kimball & Richards, "land merchants," bought Highland Park March 20, 1909.

It was then one mile from city limits.

In October, 1909, a movement was started for its annexation, and on October 15 a plat was filed with the city.

On March 8, 1910, Highland Park was annexed to Salt Lake City.

A bond for \$7500 street grading was filed.

Over \$50,000 was spent for street grading.

7000 shade trees were planted.

Over 12 miles of 5-foot cement sidewalks have been laid and an additional 10 miles are now being installed.

\$11,000 was deposited with the city for extension of city water mains.

42 modern homes, costing over \$170,000, have been built.

Extension of street car line was completed in July, 1912.

To bring additional improvements it was necessary to annex Forest Dale. This district was disincorporated November, 1911, and annexed to the city in October, 1912.

On October 3, 1913, a contract to pave Eleventh East and Highland Park Drive was let to P. J. Moran. Work will be started at once and rushed to completion.

Among the big new things for Highland Park is the proposed new city water main down Thirteenth South. It is predicted that this will be completed before October, 1914, thus giving Highland Park the best water supply in the world.

This is the place for your  
permanent home

A few choice lots, \$150 to \$350 each.

Terms, \$6 to \$14 a month for a pair.

Obeys that impulse

Phones—Wasatch 963 and 964.
